

MAKING
CHANGE
HAPPEN

NEED TO IMPROVE YOUR TEAM'S PERFORMANCE & CHEMISTRY?

TRY THE TEAM CHEMISTRY DAY

Help teams understand their team profile and what they need to do to build a more open, collaborative & psychologically safe team

What happens?

- Before the day participants fill in our Team Chemistry online survey to equip us with a profile of the beliefs and attitudes at play in relation to the team culture, psychological safety, wellbeing and leadership style.
- In the half day session we use the results to help participants reflect on their needs, behaviours and practices. We also talk about what is needed to move the team to increased levels of performance, engagement, and psychological safety.

What do delegates leave with?

- A shared appreciation of the behavioural profile of the team and the needed change.
- An understanding of what psychological safety is, the importance of it and first steps to increase it in their area.

In conjunction with...

Innovation Bubble is an insights and behavioural interventions consultancy. It provides the culture assessment tool we use with teams to unveil the conscious and unconscious drivers of their behaviour.

HALF DAY

10-35 PEOPLE

OFF-SITE LOCATION

From £10k+

Working with Innovation Bubble allowed us to uncover completely new insights. Their ideas are actionable and practical, and will make a real difference to our approach.
