

MAKING CHANGE HAPPEN

Need to get change teams equipped with change management skills?

TRY OUR IMPLEMENTING CHANGE SESSION

By spending the day learning about how others have managed change you set your change team up for maximum success.

How it works:

Designed for change teams and leaders new to change. This workshop helps them learn how to approach change in an adaptable and flexible way suited for today's ever changing world of work. The workshop helps teams clearly define the vision and goals for change. By understanding the motivating factors, the workshop will enable teams to assess the readiness and impact of change. And then build a plan that can be adapted and adjusted to a changing environment. We also build in mechanisms to hold the team to account and offer further change coaching and mentoring after the initial session.

What do delegates leave with?

- An aligned team - clear on what the change is
- An appreciation of how to manage change along with tools and techniques
- An implementation plan for the change.

Led by...

Sass Allard, a certified change management specialist and coach who transforms organisations by focusing on its people. With 20 years in publishing and media, and a strong background in delivering business transformation and process, she helps organisations identify and meet ambitious goals.
